

# SANTOSHA C

Bangalore | 7022590204 | santosha1404@gmail.com | linkedin.com/in/santosha-c

---

## EDUCATION

B.E, CS&E 2023, UBDT College, Davanagere

7.5 CGPA

---

## CAREER SUMMARY

Adaptable Software Developer with a proven track record of creative problem-solving, tackling challenges confidently, and driving results that advance organizational goals.

---

## TECHNICAL SKILLS

- |                |            |          |
|----------------|------------|----------|
| • Java         | • React.js | • Python |
| • Spring Boot  | • MySQL    | • Flask  |
| • RESTfull API | • Git      |          |
- 

## PROJECTS

### Authentication System (Auth App)

[[GitHub – Auth App Repository](#)]

**Technologies:** *Spring Boot, React.js, JavaScript, MySQL, JWT, REST API*

Developed a full-stack authentication system with secure user login and registration using Spring Boot and React.js. Implemented JWT-based authentication and authorization, along with role-based access control.

### Real-Time Chat Application

[[GitHub – Real Chat Application Repository](#)]

**Technologies:** *Spring Boot, React.js, JavaScript, MongoDB, WebSocket, StompJS, SockJS*

Developed a real-time chat app with WebSocket-based messaging and React.js frontend.

### Smart Contact Manager

[[GitHub – Smart Contact Manager Repository](#)]

**Technologies:** *Spring Boot, ReactJS, MySQL, Spring Security, OAuth2*

Built a web-based contact management system with secure OAuth2 authentication and role-based access.

---

## WORK HISTORY

**Software Developer** at Bharat Electronics Limited (BEL) with 1.6 years of Experience, (07/2024)-Present

### Adaptive Traffic Control System (ATCS) Implementation – Rourkela

- Assisted in deployment and monitoring of **ATCS for smart traffic signal management** across major intersections in Rourkela.
- Helped configure and test **real-time traffic signal controllers** that adapt signal timing based on vehicle density.
- Supported system integration between **traffic sensors, signal controllers, and central monitoring system**.
- Contributed to improving **traffic flow efficiency and reducing congestion** through adaptive signal control.
