

SANTOSHA C

Software Developer | Backend Engineer | Java | Spring Boot | Python | FastAPI

Karnataka | +91 70225 90204 | santosha1404@gmail.com | linkedin_url | portfolio_url

PROFESSIONAL SUMMARY

Software Developer with **2 years of experience at Bharat Electronics Limited (BEL)** in backend and full-stack development, system integration, and on-site deployment. Experienced in application development, deployment automation, system testing, troubleshooting, and integration of software with field infrastructure in smart-city and enterprise environments.

TECHNICAL SKILLS

Languages:	Java, Python, SQL, JavaScript
Backend:	FastAPI, RESTful APIs, Spring Boot
Frontend:	HTML5, CSS3, React.js
Databases:	MySQL, MongoDB
Tools:	Docker, Git, GitHub, Postman

WORK EXPERIENCE

Bharat Electronics Limited (BEL)
Trainee Engineer | Bengaluru, Karnataka
July 2024 – Present

Adaptive Traffic Control System (ATCS) — Rourkela Smart City

- Performed **on-site installation, configuration, integration, testing, commissioning, troubleshooting, and maintenance** of Adaptive Traffic Control Systems.
- Developed the **VDC system for traffic signal control** as part of the ATCS solution.
- Performed hardware-software integration and system validation at **live traffic junctions**, identifying and resolving communication and configuration issues.
- Tested, configured, and deployed the VDC system at **on-site traffic junctions**, supporting troubleshooting and commissioning activities.
- Worked with **traffic controllers, cameras, sensors, servers, networking equipment, VMS, UPS systems, and switches** during system integration and deployment.
- Supported post-deployment monitoring and maintenance to ensure **reliable operation of traffic management infrastructure**.

Smart Education System — BEL College

- Developed application features for online content access, student data management, and interactive learning.
- Integrated frontend and backend components and supported application testing, debugging, and deployment.
- Implemented backend functionality for data management and application workflows.
- Performed application validation and troubleshooting to resolve functional and integration issues.

PERSONAL PROJECTS

Authentication System

Java | Spring Boot | React.js | MySQL | JWT | REST APIs

- Developed a full-stack authentication system with user registration, login, JWT authentication, and role-based access control.
- Developed REST APIs using Spring Boot and integrated backend services with the React.js frontend.
- Implemented database persistence using MySQL for user and authentication-related data.

Real-Time Chat Application

Python | FastAPI | React.js | MongoDB | WebSocket

- Developed a real-time messaging application using **Python FastAPI and React.js** with WebSocket-based communication.
- Implemented REST APIs and MongoDB-based persistent message storage.
- Integrated frontend and backend services to support real-time messaging functionality.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

University BDT College of Engineering, Davanagere

2023 | CGPA: 7.5 / 10.0
