

SANTOSHA C

Bengaluru, Karnataka | +91 70225 90204 | santosha1404@gmail.com | linkedin.com/in/santosha-c-/

PROFESSIONAL SUMMARY

Software Developer with 1.9 years of professional experience in backend and full-stack development. Proficient in Java Spring Boot, Python FastAPI, RESTful API design, and React.js. Proven track record delivering production-grade systems in smart-city and enterprise environments, with strong skills in system integration, testing, and Agile delivery.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

University BDT College of Engineering, Davanagere | Graduated: 2023 | CGPA: 7.5 / 10.0

TECHNICAL SKILLS

Languages:	Java, Python, SQL
Backend:	Spring Boot, FastAPI, RESTful APIs, JWT, WebSocket (StompJS / SockJS)
Frontend:	React.js
Databases:	MySQL
Dev's & Tools:	Docker, Git, GitHub

WORK EXPERIENCE

Trainee Engineer — Bharat Electronics Limited (BEL)

Bengaluru, Karnataka | July 2024 – Present

Adaptive Traffic Control System (ATCS) – Rourkela Smart City

- Deployed and configured smart traffic signal controllers that dynamically adjust signal timings based on real-time vehicle density, reducing intersection congestion.
- Monitored system performance across major city intersections and resolved configuration issues to maintain continuous uptime for the Rourkela Smart City initiative.

Smart Education System – BEL College

- Built and integrated features including online content access, student data management, and interactive learning tools, enhancing academic efficiency across BEL College.
- Implemented seamless frontend-to-backend communication, ensuring data consistency between the user interface and server-side services.

PERSONAL PROJECTS

Authentication System (Auth App)

Tech Stack: Spring Boot, React.js, MySQL, JWT, REST API | GitHub: Auth App Repository

- Developed a full-stack authentication system with secure login, registration, and role-based access control; implemented JWT for stateless, secure API authorization.

Real-Time Chat Application

Tech Stack: Spring Boot, React.js, MongoDB, WebSocket, StompJS, SockJS | GitHub: Real Chat Repository

- Built a real-time messaging app using WebSocket (StompJS/SockJS) for bidirectional communication, backed by Spring Boot and MongoDB for message persistence.
